

Structural Vibration Measurement

Various dynamic measurements are taken, such as to **check the effectiveness of seismic isolation and vibration control structures.**

Full-scale three-dimensional vibration table

seismic waveform

【 Measuring System Block Diagram 】

Displacement Transducer CDP/SDP/OU	Acceleration Transducer ARF-A/ARGH-A/ARGL-A-T	Strain gauge
<p>CDP</p> <p>SDP</p> <p>OU</p>	<p>ARF-A</p> <p>ARGH-A (MEMS)</p> <p>ARGL-A-T (MEMS)</p>	

Up to ten measurement units can be connected together

Voltage Input Unit **TMR-331**

Strain Full Bridge Unit **TMR-321**

Strain 1G2G4G unit **TMR-322**
